

Interview Questions

Web Development

HTML/CSS Questions

1. What is HTML and what is its purpose?
2. What are the common HTML tags used for structure and content?
3. How do you create headings, paragraphs, and lists in HTML?
4. How do you insert images and links in HTML?
5. How do you create forms in HTML and what are the common input types?
6. What is the difference between HTML4 and HTML5?
7. How do you use HTML5 semantic elements to structure a webpage?
8. How do you create tables in HTML?
9. What are HTML attributes and how do you use them?
10. What is the purpose of the HTML DOCTYPE declaration?
11. How do you use HTML comments to annotate your code?
12. What is an HTML validator and why should you use one?
13. How do you use HTML to add meta data, such as keywords and description, to a web page?
14. What is the HTML character encoding and why is it important?
15. How do you create HTML templates for reuse across multiple web pages?
16. What is CSS and what is its purpose?
17. What is the box model in CSS and how does it work?
18. How do you target elements with CSS selectors?
19. What is the difference between inline, internal, and external CSS?
20. How do you use CSS to style text and background colors, fonts, and spacing?
21. How do you create a responsive design with CSS?
22. What is a CSS framework and what are some popular ones?
23. What is the difference between responsive and adaptive design in CSS?
24. How do you create a multi-column layout with CSS?
25. What is the CSS box-sizing property and how does it work?
26. What are CSS media queries and how do you use them for different screen sizes?
27. How do you use CSS to create hover effects and animations?
28. What are CSS pseudo-classes and pseudo-elements and how do you use them?
29. What is the CSS float property and how does it work?
30. How do you use CSS to position elements on a page?

31. What is the CSS clear property and how does it work?
32. How do you use CSS to create a navigation bar?
33. What is the CSS display property and how does it work?
34. What is the CSS visibility property and how does it work?
35. What are CSS grid and flexbox and how do they differ?
36. How do you use CSS to create a modal window?
37. What is the CSS z-index property and how does it work?
38. What is the CSS overflow property and how does it work?
39. What is the CSS transition property and how does it work?
40. What is the CSS transform property and how does it work?
41. What is the CSS background-clip property and how does it work?
42. What is the CSS background-size property and how does it work?
43. How do you use CSS to create a print stylesheet for a web page?

Bootstrap Interview Question:

1. What is Bootstrap?
2. Why would you use Bootstrap?
3. What is the difference between Bootstrap 3 and Bootstrap 4?
4. What are the advantages of using Bootstrap?
5. What are some of the Bootstrap components you have used before?
6. What is the grid system in Bootstrap?
7. How do you customize Bootstrap?
8. What is the difference between container and container-fluid classes in Bootstrap?
9. What is a Bootstrap theme and how do you create one?
10. Can you explain the use of Bootstrap navigation bar?
11. How do you incorporate Bootstrap in your project?
12. How do you troubleshoot Bootstrap issues?
13. What is the difference between Bootstrap and other CSS frameworks?
14. How do you create a responsive website using Bootstrap?
15. Can you explain the use of Bootstrap modals?

JavaScript Interview Questions

1. What is JavaScript?
2. What are variables in JavaScript?
3. What are the data types in JavaScript?
4. What is hoisting in JavaScript?
5. What is closure in JavaScript?
6. What is the difference between == and === in JavaScript?
7. What is the difference between null and undefined in JavaScript?
8. What is the difference between let and var in JavaScript?
9. What is the difference between asynchronous and synchronous code in JavaScript?
10. What is event bubbling and event capturing in JavaScript?
11. What is the use of 'this' keyword in JavaScript?
12. How do you declare a function in JavaScript?
13. What is a callback function in JavaScript?
14. What is a Promise in JavaScript?
15. What is a generator function in JavaScript?
16. What is a fat arrow function in JavaScript?
17. What is the difference between call and apply methods in JavaScript?
18. What is the difference between bind and call methods in JavaScript?
19. What is a map function in JavaScript?
20. What is a reduce function in JavaScript?
21. What is a filter function in JavaScript?
22. What is a forEach function in JavaScript?
23. What is a spread operator in JavaScript?
24. What is a rest operator in JavaScript?
25. What is a destructuring assignment in JavaScript?
26. What is a template literal in JavaScript?
27. What is a regular expression in JavaScript?
28. What is a module in JavaScript?
29. What is a class in JavaScript?
30. What is an object in JavaScript?

31. What is a constructor function in JavaScript?
32. What is inheritance in JavaScript?
33. What is a prototype in JavaScript?
34. What is a prototype chain in JavaScript?
35. What is a JSON in JavaScript?
36. What is a local storage in JavaScript?
37. What is a session storage in JavaScript?
38. What is an event in JavaScript?
39. What is a DOM in JavaScript?
40. What is a BOM in JavaScript?
41. What is a jQuery in JavaScript?
42. What is an AJAX in JavaScript?
43. What is a fetch API in JavaScript?
44. What is a Web API in JavaScript?
45. What is a Web Socket in JavaScript?
46. What is a React in JavaScript?
47. What is a Vue in JavaScript?
48. What is Angular in JavaScript?
49. What is a Node.js in JavaScript?
50. What is a npm in JavaScript?

ReactJS Interview Questions:

1. What is ReactJS?
2. What are the key features of ReactJS?
3. What is Virtual DOM in ReactJS?
4. What is the difference between ReactJS and AngularJS?
5. How does ReactJS handle performance optimization?
6. What is a state in ReactJS and how is it different from props?
7. What are the lifecycle methods of a React component?
8. What is JSX and how does it work in ReactJS?
9. How does ReactJS handle forms and form validation?
10. What is Redux and why is it used with ReactJS?
11. What is a Higher Order Component (HOC) in ReactJS?
12. What is the difference between a stateful and stateless component in ReactJS?
13. How does ReactJS handle asynchronous operations?
14. What is the purpose of the useEffect hook in ReactJS?
15. What is the useContext hook in ReactJS and how is it used?
16. What is lazy loading in ReactJS and how is it used?
17. What is memoization in ReactJS and how is it used?
18. What is the role of Webpack in a ReactJS project?
19. What is the difference between create-react-app and React Native?
20. What is the difference between props and context in ReactJS?
21. What is the useReducer hook in ReactJS and how is it used?
22. How does ReactJS handle server-side rendering?
23. What is a React portal and when is it used?
24. What is the difference between a static and dynamic component in ReactJS?
25. How can you implement routing in a ReactJS application?
26. What is the purpose of the key prop in ReactJS?
27. How does ReactJS handle error handling and debugging?
28. What is the difference between the useState and useReducer hooks in ReactJS?
29. What is the purpose of the useMemo hook in ReactJS?
30. How can you test a ReactJS component?

31. What are the various ways to pass data between components in ReactJS?
32. What is the difference between the ReactJS and React Native development environment?
33. What is the purpose of the useRef hook in ReactJS?
34. How can you optimize the performance of a ReactJS application?
35. What is the difference between ReactJS and VueJS?
36. What is the role of Babel in a ReactJS project?
37. What is the purpose of the React.Children utility in ReactJS?
38. What is the difference between the ReactJS and AngularJS architecture?
39. How can you implement internationalization in a ReactJS application?
40. What is the useImperativeHandle hook in ReactJS and how is it used?
41. How does ReactJS handle animations and transitions?
42. What is the useDebugValue hook in ReactJS and how is it used?
43. What is the difference between the useEffect and useLayoutEffect hooks in ReactJS?
44. How does ReactJS handle accessibility and ARIA attributes?
45. What is the difference between the useState and useContext hooks in ReactJS?
46. How can you implement drag-and-drop in a ReactJS application?
47. What is the useCallback hook in ReactJS and how is it used?
48. How can you integrate a ReactJS application with a back-end API?

NodeJS Interview Question:

1. What is Node.js?
2. What is an event loop in Node.js?
3. What is callback in Node.js?
4. What is a promise in Node.js?
5. What is the difference between callback and promise in Node.js?
6. What is the difference between synchronous and asynchronous code in Node.js?
7. What is a module in Node.js?
8. What is NPM?
9. How can you debug Node.js applications?
10. What is package.json in Node.js?
11. What is the difference between require and import in Node.js?
12. How can you read files in Node.js?
13. How can you write files in Node.js?
14. What is a stream in Node.js?
15. How can you create a web server in Node.js?
16. What is middleware in Node.js?
17. What is the purpose of the process object in Node.js?
18. How can you handle errors in Node.js?
19. How can you manage environment variables in Node.js?
20. What is a buffer in Node.js?
21. What is the purpose of the child_process module in Node.js?
22. How can you create child processes in Node.js?
23. What is the purpose of the cluster module in Node.js?
24. How can you implement authentication in Node.js?
25. What is the purpose of the crypto module in Node.js?
26. What is the purpose of the URL module in Node.js?
27. What is the purpose of the querystring module in Node.js?
28. How can you perform unit testing in Node.js?
29. What is the purpose of the assert module in Node.js?
30. How can you deploy Node.js applications?
31. What is a callback hell in Node.js?
32. What is event-driven programming in Node.js?
33. How can you create a RESTful API in Node.js?
34. What is a JSON Web Token (JWT) and how can you implement it in Node.js?
35. How can you handle file uploads in Node.js?
36. What is the difference between PUT and POST methods in Node.js?
37. How can you implement caching in Node.js?
38. What is the purpose of the net module in Node.js?
39. How can you handle sessions in Node.js?
40. What is the difference between a blocking and non-blocking I/O in Node.js?

MySQL Interview Questions

1. What is MySQL?
2. What are the advantages of using MySQL?
3. What are the different types of storage engines in MySQL?
4. What is the difference between MyISAM and InnoDB storage engines?
5. What is a primary key in MySQL?
6. What is a foreign key in MySQL?
7. What is normalization in MySQL?
8. What are the different types of normalization?
9. What is the difference between GROUP BY and ORDER BY in MySQL?
10. What is a subquery in MySQL?
11. What is a join in MySQL?
12. What are the different types of joins in MySQL?
13. What is a view in MySQL?
14. What is a trigger in MySQL?
15. What is the difference between CHAR and VARCHAR data types in MySQL?
16. What is an index in MySQL?
17. What are the different types of indexes in MySQL?
18. What is a stored procedure in MySQL?
19. What is the difference between a stored procedure and a function in MySQL?
20. How do you optimize a MySQL query?

Top 30 ExpressJS Interview Question

1. What is ExpressJS, and what are its key features?
2. What is middleware in ExpressJS, and how does it work?
3. What is routing in ExpressJS, and how does it work?
4. What is the difference between `app.get()` and `app.post()` methods in ExpressJS?
5. How do you handle errors in ExpressJS?
6. What is the role of body-parser middleware in ExpressJS?
7. What is a template engine in ExpressJS, and which template engines are supported by ExpressJS?
8. What is a session in ExpressJS, and how do you implement it?
9. How do you implement authentication and authorization in ExpressJS?
10. What are the different types of parameters supported by ExpressJS, and how do you use them?
11. What is a RESTful API, and how do you implement it in ExpressJS?
12. What is a middleware stack in ExpressJS, and how does it work?
13. What is the difference between `app.use()` and `app.METHOD()` methods in ExpressJS?
14. What is the role of the static middleware in ExpressJS?
15. How do you serve static files in ExpressJS?
16. What is the role of the morgan middleware in ExpressJS?
17. What is the difference between `res.send()` and `res.json()` methods in ExpressJS?
18. How do you handle file uploads in ExpressJS?
19. What is CSRF protection in ExpressJS, and how do you implement it?
20. What is the difference between a callback and a promise in ExpressJS?
21. What is the role of the express-validator middleware in ExpressJS?
22. How do you handle redirects in ExpressJS?
23. What is a query parameter in ExpressJS, and how do you use it?
24. How do you implement HTTPS in ExpressJS?
25. What is the role of the cookie-parser middleware in ExpressJS?
26. What is the difference between `app.locals` and `res.locals` in ExpressJS?
27. What is the role of the helmet middleware in ExpressJS?
28. What is the role of the cors middleware in ExpressJS?
29. What is the difference between `req.params` and `req.query` in ExpressJS?

30. How do you implement rate limiting in ExpressJS?
